Eli Malka

Co-Founder, CTO, Vibe Architect, and Agentic Coder. A focus on excellence and innovation defines my professional journey

Israel

Summary

I am Eli Malka a Technology Evangelist. I have extensive hands-on experience and strategic vision in designing and implementing technical architectures, driving cloud initiatives, leading development endeavors, and implementing DevOps strategies.

A focus on technological excellence and innovation has defined my professional journey, and with a comprehensive understanding of enterprise architecture, I have successfully led the design and execution of scalable, robust, and secure solutions. I believe in the transformative power of cloud technologies and have led migrations and implementations on platforms like AWS and Google Cloud, ensuring improved efficiency, scalability, and cost-effectiveness.

Hands-on knowledge:

- Technologies: AWS, GCP, Kubernetes, Docker, Helm, Microservices, Terraform, Git, Elasticsearch, Kafka, Redis, MongoDB, Nginx, Spark, SQL, IIS, Spark, .Net Core, Angular.
- Languages & Frameworks: Python, Java, C#, C++, Scala, JavaScript, Spring Boot, NodeJS, .Net Core, Angular, Rest, Jira, Confluence, Git, bitbucket, Team System, Wireshark.
- OS: Linux, Mac, Windows, Android
- Tools: Jira, Confluence, Git, Bitbucket, CircleCI, Team System, Slack, MS-Project

Experience

NICE Actimize

Solutions and Infrastructure Architect

February 2024 - Present (2 years 2 months)

Israel

As a Solutions and Infrastructure Architect, I am an expert in designing and implementing large, scalable, and data-intensive cloud-based (AWS, Azure) and AI-based solutions.

My role is pivotal in translating deep technical challenges into robust, enterprise-grade solutions while inventing sophisticated algorithms.

I meticulously validate and refine product requirements to ensure optimal alignment between technical capabilities and business objectives.

I provide technical leadership and direction to DevOps and development groups, guiding efficient execution and fostering innovation. I also actively resolve complex customer issues and contribute significantly to pre-sales activities by designing compelling technical solutions.
